datadiggers
reliable. insightful. global.

PARTNER API

DataDiggers is fully capable of hosting a network of global supply partners on our proprietary platform which aims to deliver quality responses to our clients while also taking care of our supply partners with quick and easy access to our platforms' niche features to track their panel performance as well as get paid for their partnership in a timely manner.
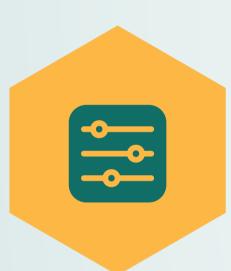

Host of features in our API

SURVEY
Get all of our live survey inventory in real time, literally at your fingertips, and choose which survey you want to participate in.

QUALIFICATIONS
When you see the qualifications/targeting of each survey opportunity, in real time, it empowers you to send the survey to the appropriate member of your panel.

QUOTAS
Control the launch and closure of each survey on your end with the exact status of each survey passed to you in real time by our server.

PROFILERS
Want to preset our profiling questions on your side, you got it! This feature enables you to filter your panel members in advance and show them the survey opportunity that fits them best.

STATISTICS
How is your panel performing on each survey? Use this API to get all the details right back in your database server.

DEFINITIONS
Not sure about standard codes that our industry uses? Use this API to get answers to your questions.

Our Partner API is dedicated to serving our partners with the same commitment level as we serve our clients.

You will receive ample guidance from our dedicated tech support throughout the API setup process, as well as later when we start delivering completes on various projects from our global clients' database together.
